

March 10, 2009

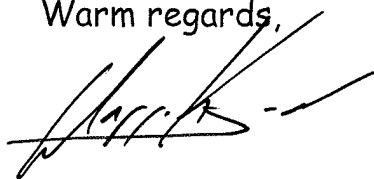

Hagay shalom,

By means of this letter, I would like to express my sincere gratitude and appreciation for the coaching sessions I took with you. I was very skeptic about coaching when we first met, skepticism that went away right after our very first session. I truly believe, I gained much knowledge, understanding and interpersonal skills during the 12 sessions seminar. These skills do help me today to better manage my professional, as well as my personal life. I am confident; these skills will keep helping me in the future.

My abilities to see matters from a different perspective, my abilities to recruit other people to join my cause, my abilities to see what is it that makes me react positively and adversely to different situations... all improved from one session to another. I very much enjoyed reading the written materials you had gathered for each session. I was also able to take examples discussed with you and apply them to my own professional and personal life.

Today, after your seminar, I do see myself as a more positive member of my organization. I highly recommend this course to others.

Warm regards,

Amit Mappa
